NANSULATE®

## Bee Protect

SPECIALLY FORMULATED TO PROTECT BEES IN THEIR HIVES

### New Protective Hive Insulation Technology

Nansulate® Bee Protect is a breathable hive insulation and mold resistant coating which is painted on the exterior of hives to create a more temperate environment - keeping the hive warmer in the winter and cooler in the summer.

### Why Coat Hives with Nansulate® Bee Protect?

-  *Insulates hives for a more temperate environment*
-  *Breathable - does not interfere with ventilation*
-  *Exceptional durability of 5 to 10+ years*
-  *Protects hives from weathering - U/V resistant*
-  *NSF certified safe for incidental contact with food*
-  *Resistant to growth of mold and fungus*
-  *Environmentally friendly, low VOC*

### Use Nansulate® Bee Protect a Variety of Ways

BeeHive Hawaii ran field studies with Bee Protect in 5 regions with positive results.

BeeHive Hawaii, a beekeeper that supplies bees & hives throughout the U.S. performed side-by-side field trials in five U.S. states, and observed increased brood productivity and honey production in the hives that were insulated with Nansulate® Bee Protect.
