

**Table 1 - Basic information on the national food survey
Czech Republic**

	Czech Republic
Reference period	2003 - 2004
Name of the dietary survey	Individual food consumption study
Acronym	SISP04
PROVIDER	National Institute of Public Health
Methodology used	24 hours recall
Total number of individuals	1751
Number of days*	2
Age range**	16 to 64
Reference publication	Ruprich J, Dofkova M, Rehurkova I, Slamenikova E, Resova D (2006) Individual food consumption - the national study SISP04. CHFCH NIPH in Prague. http://www.chpr.szu.cz/spotrebapotraviv.htm .
Remarks	

* *The duration of the survey is expected to affect the distribution of consumption, particularly at the upper tails. A short survey tends to under-estimate the proportion of individuals who consume particular food types, but at the same time, over-estimates the levels for high consumers (See Guidance document).*

** *The here reported summary statistics are calculated for adults only, defined as those between 16 and 64 years old*

**Table 2 - Daily consumption by food categories and subcategories (g/day)
Total population (Number of subjects = 1751)
Czech Republic**

N.	Cat No.	Main Category	Subcat No.	Subcategory	Mean	SD	Median	P5	P10	P95*	P97.5*	P99*
1	01	Cereals & cereal products			274	144	247	91	125	551	603	722

4	02	Sugar & sugar products including chocolate			39	38	29	0	3	112	140	177
5	03	Fats (vegetable and animal)			48	32	41	12	17	109	131	158
6	04	Vegetables, nuts, pulses including carrots, tomato			131	95	110	16	30	309	370	462
7			04A	Vegetable soups	0	0	0	0	0	0	0	0
8			04B	Vegetables, nuts, pulses except vegetable soups	131	95	110	16	30	309	370	462
9	05	Starchy roots or potatoes			103	88	100	0	0	257	304	380
10	06	Fruits			122	123	95	0	0	355	432	523
11	07	Fruit and vegetable juices, soft drinks and bottle			618	539	500	0	0	1650	1950	2250
12			07A	Fruit and vegetable juices	34	105	0	0	0	250	350	500
13			07B	Soft drinks with percentage of fruits lower than n	123	244	0	0	0	650	900	1100
14			07C	Bottled water	462	490	300	0	0	1500	1650	2000
15	08	Coffee, tea, cocoa (expressed as liquid)			559	326	525	100	200	1150	1350	1600
16	09	Alcoholic beverages			413	693	100	0	0	1774	2350	3000
17			09A	Beer and substitutes	373	684	0	0	0	1750	2250	3000
18			09B	Wine and substitutes	36	105	0	0	0	250	350	500
19			09C	Other alcoholic beverages and substitutes	4	23	0	0	0	25	50	100
20	10	Meat and meat products, offal			187	125	165	25	50	421	486	580
21			10A	Meat and meat products and substitutes	175	118	156	23	45	397	456	551

* The duration of the survey is expected to affect the distribution of consumption, particularly at the upper tails. A short survey tends to under-estimate the proportion of individuals who consume particular food types, but at the same time, over-estimates the levels for high consumers (See Guidance document). Moreover, percentiles calculated on a limited number of subjects (lower than 160, 320 and 800 for the 95th, 97.5th and 99th respectively) bear a large uncertainty and only provide a rough indication of high levels of consumption.
